This screenshot shows the top section of a GitHub repository page for 'd3.js/d3.js'. At the top right, there is a purple button labeled 'Upgrade to paid'. Below this, a horizontal line separates the header from the repository details. On the left, there are four circular profile pictures of users. To their right, the text '225 Likes · 2 Restacks' is displayed. At the bottom of this section, there are three interactive elements: a heart icon with the number '225', a speech bubble icon with the number '44', and a circular arrow icon. To the right of these are two rounded buttons: 'Share' with an upward arrow icon and a three-dot menu icon.

Elizabeth Krispin Writes Elizabeth's Substack May 7 · edited May 7
JR- I remember, in my much younger days looking at the corruption in our world and feeling so small and alone. One of the great ironies of life is that through this hideous travesty called COVID, we have come to find you and the stellar humans like you. Pierre Kory. Paul Marik. Assem Malhotra

Tess Laurie, A Midwestern Doctor, Dr Robert Malone, Bobby Kennedy. I am so inspired by all of you.

A wise man once said, "I truly believe we are at a pivotal time, where the work that each of us puts in can make an immense impact on the future course of this world." (A Midwestern Doctor on Substack)

I, for one, am inspired to act upon that advice.

Thank you. I am eternally both grateful and indebted to you folks - for saving me from despair. 😊

Excellent material, thank you for working so hard in this fight Jessica!
I wanted to share this here to highlight the absurdity of the shots:
Rushed, guaranteed to succeed, corruptly tested, experimental injection? ✓

That killed and maimed well-over a thousand people during the severely abbreviated trial phase? ✓

And also caused 23 spontaneous abortions and 75 serious clinical events from 270 expectant mothers during said trial? ✓

Using a highly dangerous mRNA tech that in the past killed every mouse with ADE? ✓

A tech previously untested on humans, the emergency usage of which spanned over a century of

vaccine safety and efficacy research? ✓

For a virus far less deadly than the lockdowns themselves? ✓

Also less deadly than the flu - which conveniently went AWOL when COVID hit the scene? ✓

For a (cold) virus they've been unable to cure after over a century of trying? ✓

But somehow all of a sudden, the criminal pharmaceutical companies - notorious for rampant felonious trial fraud - figured it out in less than a year? ✓

And then went on to manufacture billions of quality assured, safe and effective doses at record speed which were then lawfully distributed by the US military? ✓

People actually bought into this on a grand scale, and voluntarily injected this poison? ✓

Longer version with inline references here: <https://tritorch.com/doormat>

This is one of the emails I received the other day. I get hundreds daily, and I am hearing you all.

This particular note spoke loudly to me and this lovely person gave me permission to share her words.
